PROFESSIONAL SUMMARY

UX Architect with nearly a decade at Centene leading design-systems ownership, information architecture, and AI-enhanced product experiences for millions of users in heavily regulated environments. Directs AI coding agents to build what she designs, shipping production tools (dashboard, CLI, design system) through Cursor and Claude Code. Specializes in the architecture of experiences: defining how AI surfaces in a product's UX, cross-team design leadership, and systems thinking at enterprise scale.

EXPERIENCE

Senior UX Designer/Developer Centene Corporation — St. Louis, MO

June 2016 - Present

Centene is a Fortune 25 enterprise. Led design for the Provider Search team building member-facing tools used by tens of millions of people in a heavily regulated environment.

- Led end-to-end design (research, content, design system, analytics) for Find a Provider, increasing user satisfaction by 40% across Medicaid, Medicare, and Commercial products
- Designed GNAT, an internal portal configuration UI that let project managers stand up a new insurance plan site in an afternoon without code, cutting setup time by 60%. Live for four years.
- Conceptualized AI-enhanced conversational search interface for Medicare Future State: agent-agnostic primitives that let users of any persona interact directly with site content and external data sources like provider directories
- Contributed to Fondue Design System. Built a custom accessibility auditing tool that caught seven WCAG gaps missed by industry-standard tools, generating visual reports for header hierarchy, tab order, and broken links.
- Designed and shipped omni-channel experiences across Member, Provider, and internal portals. Mentored junior designers, led design critiques, and presented design strategy to senior leadership.

UX Architecture • Design Systems • AI/ML in UX • Accessibility • User Research • Information Architecture • Conversational Interfaces

Web, Interactive, UI/UX Designer Masergy Communications — Plano, TX

February 2015 - June 2016

Masergy was an enterprise SD-WAN and cybersecurity provider (acquired by Comcast in 2021). Designed customer-facing portals and lead-generation tools for the marketing org.

- Designed and built cybersecurity lead generation tools and marketing tools using HTML5, Drupal, and AWS
- Designed a WebRTC-based Visual Auto Attendant tool, demonstrating fluency in interactive communications interfaces
- Collaborated with marketing and engineering teams to deliver responsive and scalable web experiences

UI/UX Design • WebRTC • HTML5 • Drupal • AWS

PHP/MySQL Developer University of North Texas — Denton, TX

July 2014 - February 2015

Worked on the Faculty Profile System for UNT's institutional research team, managing database migration and data visualization.

- Migrated Faculty Profile System database from MySQL to Oracle, ensuring data integrity during the transition
- Developed an award-winning HTML5 data visualization project (Texas Association for Institutional Research, 2015)

Database Migration • Oracle • MySQL • Data Visualization • HTML5

Web, UX Developer Associated Network Partners — Plano, TX

February 2013 - June 2014

Designed UI/UX for a Unified Communications platform and network monitoring tools for an enterprise telecom provider.

- Designed end-to-end UI for a Unified Communications Customer Administration Portal
- Built interactive network maps that improved situational awareness for stakeholders
- Maintained corporate website, focusing on content management and user experience

UI/UX Design • Network Monitoring • Information Architecture

EDUCATION

Bachelor of Arts in Video Production Webster University — St. Louis, MO May 2009 - May 2011

PROJECTS

Fathom (fathomdx.io) Designer & Architect fathomdx.io Ongoing

Designed and built (directing Cursor/Claude Code agents) a self-hosted memory and identity platform for persistent AI agents. End-to-end ownership of the management dashboard, CLI, and versioned design system over a Postgres/pgvector store. Personality and continuity kept agnostic from the models that run it.

txt2speech.org Designer & Developer txt2speech.org 2024

Designed and built a free, fully local, unlimited-length text-to-speech web app. Leverages multiple TTS technologies, browser storage, and JS audio manipulation. Processing over one hundred long-form conversions per month.

windchimesimulator.com Designer & Developer windchimesimulator.com 2024

Web-based wind chime physics simulation for customizable ambient soundscapes, combining realistic physics, audio synthesis, and accessible controls. Over thirteen hundred monthly active users.

AWARDS & HONORS

Texas Association for Institutional Research Award (Best Data Visualization) 2015

Masergy Performance Beyond Expectations Award 2016

Startup Weekend Winner (Compost Denton) 2014

SKILLS

- AI & Product Design: AI/ML Integration in UX, Human-AI Interaction, Conversational Interfaces, RAG (Vector Database Retrieval), Agent Frameworks, Context Management
- UX Architecture: Design Systems, Information Architecture, Accessibility (WCAG), User Research, Design Leadership, Omni-channel Experience
- Technical: React, TypeScript, Python, Figma, HTML/CSS, Node.js, Postgres, Docker, Git
- Data & Analytics: D3.js, Tableau, Data Visualization, User Analytics
